Supplementary Fig. 4. Subjective evaluation of CCTA images. Image examples illustrate 5-point scale for image quality.

A-D. Panels correspond to 120–70 kVp in CCTA study, respectively. Image in (A) has sharp edge, which was still assigned score of 5. Image in (B) has slightly blurred edge, which was assigned score of 5 as well. Artifacts increased in images in (C) and (D), which were assigned scores 4 and 3, respectively. RCA = right coronary artery.
