Supplementary Fig. 5. 9.4T MRI of gadoxetic acid-based cell phantoms. (A) T1 weighted image, (B) region of interest placement, and (C) graph plotting T1 saturation recovery curve of each well. In A and B, CMV-Kozak-(codon-optimized) hOATP1B3-IRES-GFP-transfected HEK293 is shown in left column, and CMV-blank-transfected HEK293 is shown in right column.
