Supplementary Fig. 6. 9.4T MRI of gadobenate dimeglumine based cell phantoms. (A) T1 weighted image, (B) region of interest placement, and (C) graph plotting T1 saturation recovery curve of each well. In A and B, CMV-Kozak-(codon-optimized) hOATP1B3-IRES-GFP-transfected HEK293 is shown in left column, and CMV-blank-transfected HEK293 is shown in right column.
