SCOPE AND TYPES OF ARTICLES

The Korean Journal of Radiology, the official English language journal of the Korean Society of Radiology, publishes original contributions valuable to the advancement of medical diagnosis and treatment. Published bimonthly in February, April, June, August, October and December, the journal reports clinical and other investigations related to radiology and its allied sciences, publishing full-length Original Articles, Reviews, Pictorial Essays, Case Reports, Letters to the Editor, and Editorials. Of these, Reviews are generally published as a commissioned paper at the request of the editor(s) and Editorials are mostly written by the editor(s). We will undertake the evaluation of your manuscript with the understanding that the study followed the journal’s policies and guidelines explained hereinafter. Authors will be asked to confirm their compliance with the journal’s policies and guidelines during manuscript submission on the web page; and each author will be asked to submit a signed “Authorship Responsibility, Conflicts of Interest, and Copyright Transfer/Publishing Agreement” (available at Instructions & Forms at http://mc.manuscriptcentral.com/kjr) and a completed “ICMJE Form for Disclosures of Potential Conflicts of Interest” (available at http://www.icmje.org/coiDisclosure.pdf) prior to acceptance of their manuscript.

REDUNDANT PUBLICATION AND RESEARCH ETHICS

Submitted manuscripts should not contain any previously published materials and should not be under consideration for publication elsewhere. The Council of Science Editors defines redundant publication as reporting substantially the same work more than once, without attribution of the original source(s). A manuscript that is potentially redundant includes the following characteristics: (1) at least one of the authors has contributed to both or all reports (if there are no common authors, plagiarism is more likely than redundant publication); (2) the subject or study populations are often the same or similar; (3) the methodology is typically identical or nearly so; and (4) the results and their interpretation generally vary little, if at all. Guidelines for multiple publications are based on instructions described in the Uniform Requirements for Manuscript Submitted to Biomedical Journals (Ann Intern Med 1988;108:258-265). If authors believe their manuscript may be redundant, they should ask the editor about this in a cover letter accompanying their submission and should clearly state the reuse/overlap of study materials in Materials and Methods of the manuscript. In the letter, the manuscript authors should explain how their report overlaps with already published material, or how it differs. To help the editor determine the possibility of redundant publication, a copy of such material previously published or being considered for publication elsewhere should be included. Any investigations involving humans and animals should be approved by the Institutional Review Board and Animal Care Committee, respectively, of the institution where the study took place. Korean Journal of Radiology will not consider any studies involving humans or animals without the appropriate approval. Informed consent should be obtained, unless waived by the institutional review board, from patients who participated in clinical investigations. If experiments involve animals, the authors should also comply with NIH guidelines for the use of laboratory animals. Original articles submitted to the Korean Journal of Radiology, which address any investigation involving humans and animals should include a description about whether the study was conducted under an approval by the Institutional Review Board (with or without patient informed consent) and Animal Care Committee, respectively, of the institution where the study was conducted. Korean Journal of Radiology can request an approval by Institutional Review Board or Animal Care Committee for the other types of articles when necessary. For the policies on the research and publication ethics not stated in these instructions, “Good Publication Practice Guidelines for Medical Journals (http://kamje.or.kr/publishing_ethics.html)” or “Guidelines on good publication (http://www.publicationethics.org.uk/guidelines)” can be applied. Descriptions appearing in each article are the
responsibility of the authors and not of the Korean Journal of Radiology.

AUTHORSHIP AND CONFLICT OF INTEREST

Authors are required to make clear the nature of their contribution to their manuscript. To be listed as an author at byline, an individual has to meet all three categories established by the International Committee of Medical Journal Editors (ICMJE): (1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; (2) drafting the article or revising it critically for important intellectual content; and (3) final approval of the version to be published (www.icmje.org/ethical_1author.html). The ICMJE further states that acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship. Individuals who have contributed substantially to some but not all of the three categories, or in other areas, should be listed in Acknowledgments. We also recommend limiting the number of authors to not more than 9 in number. The Korean Journal of Radiology does not allow dual or shared authorship. Please resolve this issue before the manuscript is submitted. Korean Journal of Radiology does not allow adding authors or changing the first or the corresponding authors, once its decision of Minor Revision or Accept is made. If any author wishes to be removed from the byline, he or she should submit a letter signed by the author, as well as all other authors, indicating his or her wish to be deleted from the list of authors. Any change in the name order in the byline requires a letter signed by all authors indicting agreement with the same. All potential conflicts of interest including any research funding, other financial support, and material support for this work, if any, exists, need to be clearly identified in the unblinded full title page.

GUIDELINES FOR MANUSCRIPT Formatter

1. General Guidelines

- The manuscript must be written in English. For medical terms such as proper nouns, generic names of medicines, and units of measurement, use the original term. Abbreviation should be minimized. The use of acronyms and abbreviations is discouraged and should be kept to a minimum. When used, they are to be defined where first used, followed by the acronym or abbreviation in parentheses. Radiation measurements and laboratory values should be in accordance with the International System of Units (SI) (resources: “SI Units in Radiation Protection and Measurements, NCRP Report no. 82” [August 1985]; “Now Read This: The SI Units Are Here,” JAMA 1986;255:2329-2339).
- The manuscript should be organized in the following order: full title page (including all the author details, acknowledgements, and statements on conflicts of interest) as a separate file; blinded main document in a single file, which starts with blinded title page (title only) and contains every component except for figures; separate figures; and appendix or other separate supplementary materials if necessary.
- All text files should be in Microsoft Word format (.doc or .docx) and all figures needs to be in .jpg/.jpeg or .tif/.tiff formats. Do not upload texts files as .pdf.
- The manuscript should use 12-point font size and be double spaced on 21.6 cm by 27.9 cm (letter size) or 21.0 cm by 29.7 cm (A4) paper, with an approximate 3-cm margins.
- Authors should not number the pages or the lines. The page and line numbers will automatically be generated when the uploaded manuscript is converted to pdf format, with the blinded title page being page 1.
- Korean Journal of Radiology performs double-blinded review of the submitted manuscripts. Authors’ names, their affiliations, or any other remarks that may identify the authors should not appear in the blinded main document, figures, appendix, and supplementary materials for review for a blinded review. In case those are found, the editorial office will ask the authors to reupload the files after hiding them or will delete them on behalf of the authors before sending the manuscript for an external peer review.
- The names and locations (city and state or country) of manufacturers of equipment and non-generic drugs should be given.
- Please also refer to most recent articles published in Korean Journal of Radiology for style.

2. Full Title Page

- Include the following items on the unblinded full title page:
  - Title
  - Names, academic degree, affiliations, and addresses of the authors
  - Contact information of the corresponding author
  - Type of manuscript
  - Word count (from Introduction to Discussion)
  - Acknowledgments
  - Conflicts of interest statement
- Full author name, not initials, must be provided in the order of first name, middle name (if exists), and last name for all participating authors, e.g. John (first name)
The list of authors in the full title page and the list of authors entered at the manuscript submission website (http://mc.manuscriptcentral.com/kjr) must be the same.

When authors from different institutions/addresses are included, match authors with their organizations by placing the organization number in superscript after the authors’ name.

The contact information of the corresponding author should include mailing address, phone number, fax number, and e-mail address.

Those who contributed to the work, but who did not fulfill the requirements for authorship, should be included in acknowledgments.

All funding, other financial support, and material support for this work, if it exists, should be clearly identified in the conflict of interest statement. If no conflicts of interest exist for any of the authors, please describe as such.

3. Main Document

A main document is a blinded document for review and contain the following components (see 3.1 to 3.6) in a single Microsoft Word file, each component starting on a separate page: blinded title page, abstract (when required), main body, references, tables, and figure legends.

Do not embed images in the main document.

Do not mix tables with the text. Tables should be placed collectively after references on separate pages.

3.1. Blinded Title Page

On the blinded title page, write only the title of the manuscript. Do not include the authors’ names, or other details.

3.2. Abstract

Start on a separate page. The word limit is 250 words for Original Article, 120 words for Pictorial Essay and Review, and 80 words for Case Report. Letter to the Editor does not require Abstract.

Do not use reference citations. Abbreviations should be minimized and, if used, must be defined within the abstract by full terminology followed by abbreviation in parenthesis.

Abstract for an Original Article must be structured including Objective, Materials and Methods, Results, and Conclusion as follows:

Objective: In one or two sentences, indicate the specific purpose of the article, and indicate why it is worthy of attention. The purpose stated here should be identical to the one given in the title of the paper and the introduction.

Materials and Methods: Describe succinctly the methods used to achieve the purpose explained in the first paragraph, stating what was done and how bias was controlled, what data were collected, and how the data were analyzed.

Results: The findings of the methods described in the preceding paragraph are to be presented here, with specific data. All results should flow logically from the methods described.

Conclusion: In one or two sentences, state the conclusion of the study. This should relate directly to the purpose of the papers, as defined in the first paragraph of the abstract.

Unlike Original Article, abstract for Pictorial Essay, Review, or Case Report consists of single paragraph without separate sections. Please refer to the most recently published articles for style.

At the bottom of the abstract, write 3-6 keywords (index terms).

3.3. Main Body

3.3.1. Original Article

3.3.1.1. Introduction

Briefly describe the purpose of the investigation, including relevant background information.

3.3.1.2. Materials and Methods

The first paragraph should address whether the study was conducted under an approval by the Institutional Review Board (with or without patient informed consent) and Animal Care Committee of the institution where the study took place for any investigation involving humans and animals, respectively.

Describe the research plan, the materials (or subjects), and the methods used, in that order.

Explain in detail how the disease was confirmed and how subjectivity in observations was controlled.

When experimental methodology is the main issue of the paper, describe the process in detail so as to recreate the experiment as closely as possible.

If the study includes reuse/overlap of materials previously published or under consideration for publication elsewhere, clearly state the reuse/overlap of study materials.

3.3.1.3. Results

Present the study data in a clear, logical sequence.

Because biometrics involves variations in exact measurements, follow the rule of using statistics when
experimentation is described.

- If tables are used, do not duplicate tabular data in the text, but do describe important trends and points.

3.3.4. Discussion
- Observations pertaining to the results of research and other related materials should be interpreted for your readers.
- Emphasize new and important observations; do not merely repeat the contents of the results.
- Explain the meaning of the observed findings along with its limits, and within the limits of the research results connect the conclusion to the purpose of the research.
- In a concluding paragraph, summarize the results and their meaning.

3.3.2. Review
- A review is generally published as a commissioned paper at the request of the editor(s). We do evaluate unsolicited submissions, but many of them are in fact turned away to the authors after a review by the editor(s).
- A review article is a comprehensive scholarly review on a specific topic, but is not an exhibit of series of cases. The latter should be submitted as a Pictorial Essay. The number of figures should not exceed 15 figures.
- Neither new information nor personal opinion is to be included.
- An introduction which explains the scope of the paper is required, and headings should be used appropriately to separate and organize the text.
- The length should not exceed 15 pages.
- Please also refer to most recent Review articles published in *Korean Journal of Radiology* for further details on formatting.

3.3.3. Pictorial Essay
- This is a visual teaching material. The amount of text is smaller than that of a typical comprehensive review articles. Messages are mainly delivered by figures and their legends.
- As many as 30 figures will be accepted.
- A short introduction to explain the scope and summary of the paper should be included. Headings should be used appropriately for separation and organization of text.
- Please also refer to most recent Pictorial Essay articles published in *Korean Journal of Radiology* for further details on formatting.

3.3.4. Case Report
- A case report should be organized into three sections including Introduction, Case Report, and Discussion as follows:

Introduction: Describe briefly the general background and significance of the case study.

Case report: The clinical study should be restricted to matters directly related to imaging diagnosis or radiological procedures.

Discussion: Focus on the specific area which the case emphasizes and avoid excessive literature summary or explanations about previously published materials.
- Please also refer to most recent Case Report articles published in *Korean Journal of Radiology* for further details on formatting.

3.3.5. Letter to the Editor
- Constructive criticism of a specific thesis published by *Korean Journal of Radiology* is welcome. Letters dealing with subjects of general interest within the field of radiology or personal opinions on a specific subject within the realm of scientific study may also be accepted.
- The maximum length of a letter to the editor is 3 pages.

3.4. References
- Start on a separate page, numbering the references consecutively in the order in which they appear in the text.
- Limit references to 40 for Original Article, 60 for Review, 15 for Pictorial Essay, 10 for Case Report, and 4 for Letter to the Editor.
- All references must be cited in the text.
- Unpublished data should not be cited in the reference list, but parenthetically in the text, for example: (Smith DJ, personal communication), (Smith DJ, unpublished data).
- Journal names should be abbreviated according to the Index Medicus.
- All authors are to be listed when six or fewer; when there are seven or more, the first six should be given, followed by “et al.”
- Inclusive page numbers (e.g., 111-114) are to be given.
- The style and punctuation for journal articles, books, or book chapters should follow the format illustrated in the following examples:

Journal article

Book

Chapter in a book

- Web content can be cited and the following items should be listed: author(s) (if any); title of the page or content; name or owner of the Web site; URL; and publication, update, and access dates

Web content

3.5. Tables
- Start on a separate page. Tables should be numbered using Arabic numerals. The title of the table should be clearly stated in the form of a sentence or a paragraph. The first letters of nouns and adjectives should be capitalized.
- Tables should not be longer than one page and should contain at least four lines and two columns of data.
- Tables are to be numbered in the order in which they are cited in the text.
- Abbreviations should be defined in a footnote below each table.
- Tables should be self-explanatory and readily comprehensible.
- Tables from previously published works should not be used.

3.6. Figure Legends
- Start on a separate page. Legends should be numbered in the order in which they are cited, using Arabic numerals.
- Write a description using one complete sentence rather than a phrase or paragraph.
- In case of the use of previously published figures, the original source must be revealed in the figure legend.

4. Figures
- All figure parts related to one patient should have the same figure number and use English letters after the numerals to distinguish each figure part, e.g. Fig. 1A, 1B, etc.
- Send all figure parts as separate images (do not combine).
- Labels/arrows should be of professional quality and touch the edge of the feature being labeled. Do not use equilateral triangles for arrowheads.
- Remove all names and all other identifiers of the patient, authors, and authors’ institutions from the figures.
- After cropping to the area of interest, images should be at least 300 dpi in resolution and a minimum of 3 inches to a maximum of 7 inches both in width and height.
- Color figures should be in RGB color mode and line drawings should be black on a white background.
- For initial submission, both .jpg/.jpeg and .tif/.tiff formats are acceptable. Authors will be asked later to submit .tif/.tiff files for a revised manuscript.
- Written permission from the prior publisher should be obtained for the use of all previously published illustrations and copies of the permission letter should be submitted.
- Authors may wish to make written suggestions about the arrangement of illustrations.

REVIEW PROCESS AND MANUSCRIPT DECISION
- Submitted manuscript will first be evaluated at the editorial office regarding the completeness and suitability to Korean Journal of Radiology of the submitted materials. Modifications/corrections may be requested to the authors at this stage before starting the peer review.
- Submitted manuscripts will generally be reviewed by two peer reviewers, who are experts in the submitted subject matter and make suggestions to the editor(s), as well as by the editor(s).
- Korean Journal of Radiology performs double-blinded peer review of the submitted manuscripts. Both the peer reviewers and the authors are not revealed to the other. Authors may suggest preferred and non-preferred reviewers during manuscript submission. However, the ultimate selection of the reviewers will be determined by the editor(s).
- Authors can monitor the progress of the manuscript throughout the review process at http://mc.manuscriptcentral.com/kjr.
- Submitted manuscripts will be rendered one of the following decisions:
  Accept: The manuscript is accepted for publication.
  Minor Revision: A revision needs to be submitted within 60 days of the decision. Otherwise, the manuscript will be treated as a new submission.
  Major Revision: A revision needs to be submitted within 180 days of the decision. Otherwise, the manuscript will be treated as a new submission.
  Reject: Resubmission allowed: Authors are allowed to resubmit their work. However, it is effective only
when they are able to respond to the various reviewer comments and make substantial changes to the study. This type of manuscript is generally not suitable for publication unless the authors conduct further research or collect additional data. The resubmitted manuscript will be treated as a new submission and, therefore, please do not submit point-by-point response or annotated revised copy.

Reject: No further consideration: The paper will no longer be considered for publication.

• A decision to accept a manuscript is not based solely on the scientific validity and originality of the study content; other factors are considered including the extent and importance of new information in the paper as compared with that in other papers being considered, the Journal’s need to represent a wide range of topics, and the overall suitability for Korean Journal of Radiology.

• Decision letters usually, but not always, convey all factors considered for a particular decision. Occasionally, the comments to the authors may appear to be inconsistent with the editorial decision, which takes into consideration reviewers’ comments to the editor, as well as the additional factors listed above.

• If, as the author(s), you believe that we have rejected your article in error, perhaps because we have misunderstood its scientific content, please send an appeal by e-mail to the editorial office (kjr@radiology.or.kr). However, appeals are ineffective in most cases and are discouraged.

ELECTRONIC SUBMISSION OF MANUSCRIPT

• Electronic submission is the only method of submitting manuscripts to Korean Journal of Radiology. Authors must go to the http://mc.manuscriptcentral.com/kjr. Please refer to the instructions, help, and notes sections provided at the web site for any questions.

• Checklist of requirements

☐ Submit manuscripts as .doc or .docx files. Double space all parts of manuscript.
☐ Complete full title page (See Guidelines for Manuscript Formatting).
☐ Main Document including blinded title page.
☐ Abstract, if required, within the word limit: 250 words for Original Article, 120 words for Pictorial Essay and Review, and 80 words for Case Report.
☐ Include Institutional Review board approval, informed consent, and/or animal care committee approval for an Original Article.
☐ Do not embed figures in the main body or mix figures or tables with the texts.
☐ Digital figures must be at least 300 dpi and a minimum of 3 inches to a maximum of 7 inches in width and height. Use .jpg/.jpeg or .tif/.tiff formats (for revisions use .tif/.tiff).
☐ Authors will be asked to confirm their compliance with the journal’s policies and guidelines during the initial manuscript submission on the web page (See Scope and Types of Articles).
☐ Verify accuracy of reference information to enable hyperlinks in online version of journal to function properly.
☐ For previously published materials, send written permission to reprint any figure or any other applicable permissions.
☐ Provide copies of any material for which there is overlap with your manuscript (see Redundant Publication).

INSTRUCTIONS FOR SUBMISSION OF REVISED MANUSCRIPT

• A Major Revision and a Minor Revision should be submitted within 180 days and 60 days, respectively, of the decisions. Otherwise, the manuscript will be treated as a new submission.

• Please carefully read and follow the instructions written here and those included in the manuscript decision e-mail.

• To start the submission of a revised manuscript, log in at the http://mc.manuscriptcentral.com/kjr. Click the “Manuscripts with Decisions” queue or “Manuscripts Awaiting Revision” queue in the “My Manuscripts” area. Then, find the submission you wish to start the revision process for and click on the “Create Revision” link for that manuscript. Authors can also click on the revision link in the “Author Resources” area.

• To continue with a revised manuscript that has yet to be submitted, click on the “Revised Manuscripts in Draft” queue in the “My Manuscripts” area. Find the submission you wish to continue with and then click on the “Continue Submission” button.

• Please submit a point-by-point response to the editor/reviewer comments by directly putting it in the box provided in “View and Response to Decision Letter” page as well as by uploading the same as a Microsoft Word document file (.doc/.docx) on the “File Upload” page.

• Any changes in the authorship should be reported to the editor in the cover letter.

• For file uploading, if you have updated a file, please delete the original version and upload the revised file. To designate the order in which your files appear, use the
dropdowns in the “order” column on the “File Upload” page.

• For a revision, we require two copies of the Main Document. Each should be a Microsoft Word document. The FIRST COPY should represent the final “clean” copy of the manuscript. The SECOND “annotated” COPY should have changes tracked using the track changes function in Microsoft Word with marginal memos indicating changes (e.g., SE-1 indicates response to comment #1 of the Section Editor; R2-3 indicates response to comment #3 of Reviewer #2).
• The figures for a revised manuscript should be in .tif/.tiff format.

COPYRIGHT

Materials published in the Korean Journal of Radiology are protected by copyright. Not a part of this publication may be reproduced without written permission from the Korean Society of Radiology. Requests for permission to use previously published material must be in writing and e-mailed or faxed to the editorial office of the Korean Journal of Radiology.

PUBLICATION FEE

Authors whose manuscripts are finally accepted for publication in the Korean Journal of Radiology will be charged a minimum publication fee, so-called page charge: 100,000 KRW for Korean authors and 100 USD for non-Korean authors for Original Article or Pictorial Essay; 50,000 KRW for Korean authors and 50 USD for non-Korean authors for Case Report; and no fee for Review, Letter to the Editor, or Editorial.

SUBSCRIPTION INFORMATION

Korean Journal of Radiology is an Open Access Journal, of which full-text articles are freely available electronically at kjronline.org. The print journal is also available for those who wish to subscribe at yearly charges shown below.

• 15,000 KRW for members of Korean Society of Radiology
• 100,000 KRW for subscriptions from Korean address by non-KSR members
• 200 USD for subscriptions from non-Korean address by non-KSR members

Please send the editorial office a written request of subscription via e-mail or fax. You can make payments via direct deposit to our bank account or by sending us a check. The bank account information is as follows:

• Bank Name: Woori Bank
• Branch Name: KANGNAM KYOBO TOWER BR.
• Swift Code : HVBKKRSEXXX
• Beneficiary: The Korean Society of Radiology
• Account No.: 1005-101-802601
• Tel: 82-2-578-8003
